

Riparian Restoration on Sims Bayou

Water Body	Sims Bayou Above Tidal (Assessment Unit 1007D_02)
Location	Houston
River Basin	San Jacinto River
Contractor	Student Conservation Association, Inc. (SCA)
Project Period	February 11, 2017 – May 31, 2019
Project Total	\$438,797 (Federal 60% and Local Match 40%)

Background

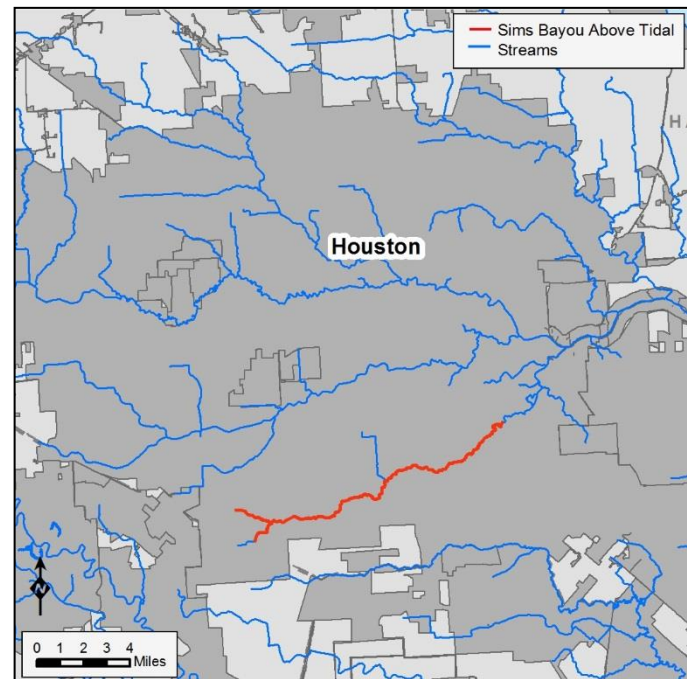

The Sims Bayou Above Tidal watershed encompasses approximately 64 square miles of urbanized land located southwest of Houston, Texas. Sims Bayou is considered impaired for contact recreation because it does not meet the standards for *E. coli*. In 2010, TCEQ published the Four Total Maximum Daily Loads (TMDL) for Indicator Bacteria in Sims Bayou Above Tidal and Tributary for Segments 1007D and 1007N.

According to the TMDLs, potential sources of bacteria within the watershed are non-compliant wastewater treatment facility discharges, stormwater runoff from permitted storm sewer sources, sanitary sewer overflows, illicit discharges from storm sewers, failing on-site sewage facilities, and runoff from areas not covered by a permit.

Project Description

This project targets assessment unit (AU) 1007D_02 on the Sims Bayou Above Tidal segment which is impaired for bacteria. AU 1007D_02 includes Milby Park, a 67-acre public park surrounded by an industrialized area. SCA will implement best management practices in this area including trash litter cleanup, erosion control using mulch and vegetation, habitat restoration in the riparian buffer, and public education.

SCA will recruit and train student crews and interns to establish two acres of riparian zone in Milby Park along Sims Bayou. The riparian zone will slow the velocity of stormwater runoff and allow sediment to settle out, reducing the pollutant load to the waterbody. Interns will receive online and in-person training. In addition to establishing a riparian zone, this project will engage volunteers in trash cleanup and conservation activities at Milby Park and will provide for Texas Stream Team monitoring.

Current Status

Contract has been executed.
